

The Starmix GS- and AS-Series

Professional cleaning with Starmix means uncompromising perfection. Depending on the requirements, there are a variety of options available with regard to the container material, a number of different volumes ranging from 20–78 litres and a range of outputs from 1000 Watt to 3600 Watt. All devices are quiet and have the proven efficient filter technology for constant suction output, efficient working and extreme durability.

STARMIX Quality
Made in Germany

The filter system of the GS- and AS-Series

Suitable for wet and dry vacuuming: Innovative filter material and excellent dust retention capacity

The excellent material of the folded filter cartridges guarantees a high level of stability and wet resistance. Vacuum cleaner of the Starmix GS- and AS-Series are, depending on their application, equipped with polyester and/or with cellulose folded filters. The extremely sturdy filter cartridge with its smooth surface guarantees a high level of dust retention capacity and long work intervals. Of course, all Starmix filters can be recycled in an environmentally-friendly manner.

Efficient filter concept:

- extremely sturdy folded filter cartridge with 3.200 cm² and/or 7.200 cm² surface
- optimised filter material (Cellulose)
- optimum protection for the filter cartridge against impacts

Benefits:

- extremely high dust retention
- very long service life of the filter cartridge
- reduced system costs

Noise reduction:

- new type of air duct reduces the noise level significantly

Benefits:

- can also be used in busy environments (office, hotel, ...)

Control display:

- simple operation via rocker and/or rotary switch
- Rotary switch: stepless speed control (optional)
- Rocker switch: ON/OFF switch

Benefits:

- central, clear and simple handling

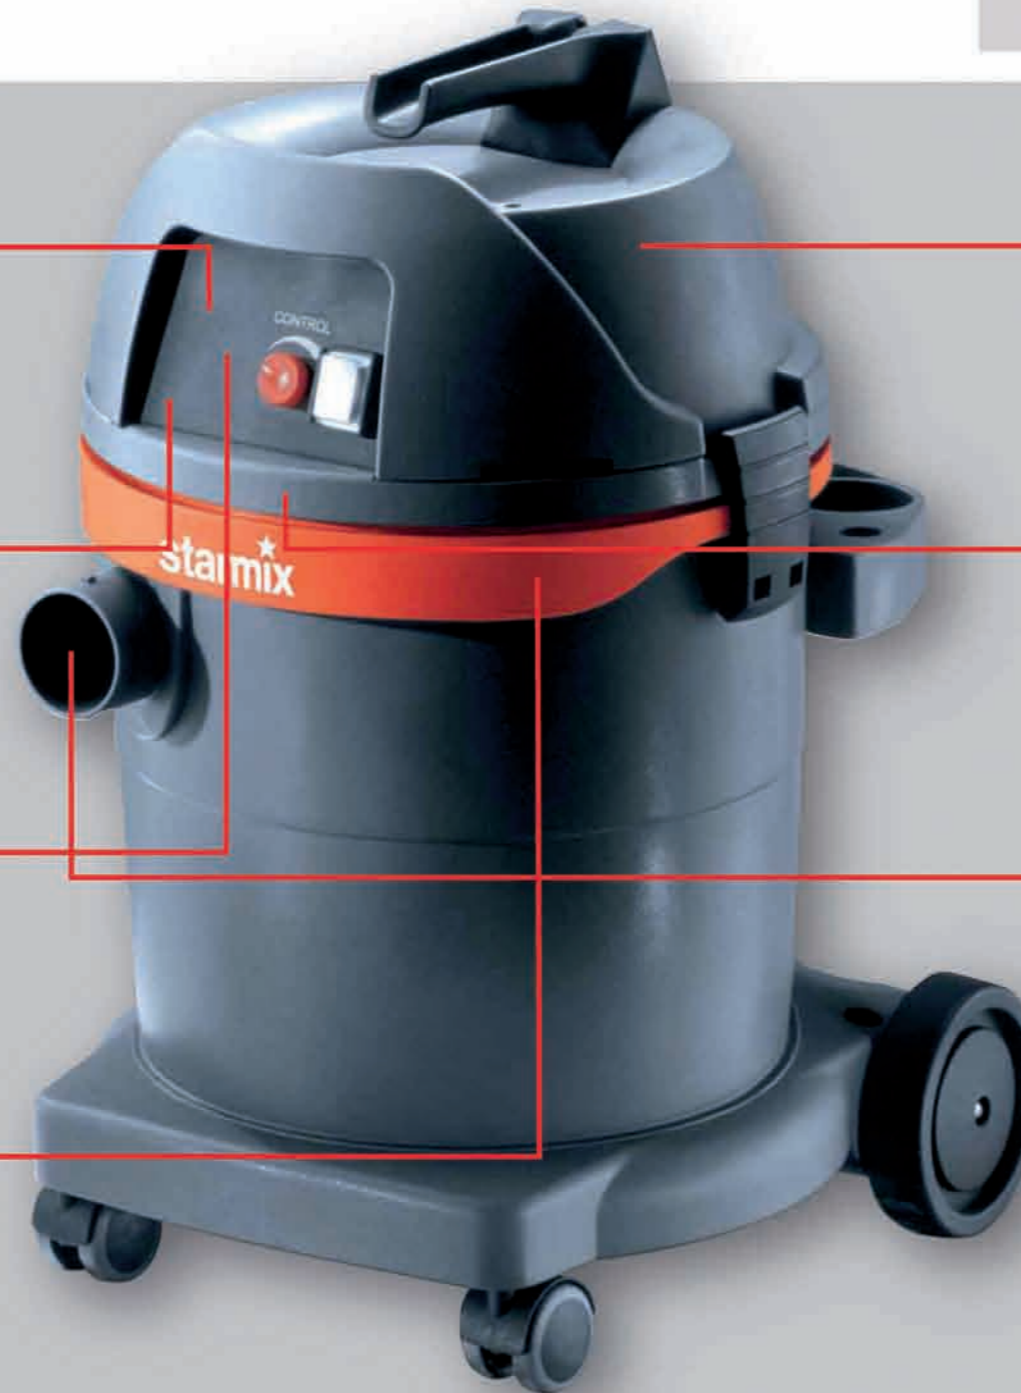

High-performance motor fan:

- Bypass-motor (two separate air circuits for cooling and work air allow the vacuuming of liquids and optimum cooling of the motor)
- absolutely quiet thanks to encapsulated motor fan
- Overflow protection when suctioning water

Benefits:

- extremely long service life
- safe, clean working

Modular construction:

- very broad product range
- different container sizes and motor fans available
- different container materials available

Benefits:

- the right vacuum cleaner for every application

Service-friendly maintenance:

- simple filter change thanks to practical bayonet coupling

Benefits:

- no special tools required

Container:

- STARMIX Tangential Cyclone principle; due to the tangential air intake, deflection-free suctioning of the dirt

Benefits:

- no blocking
- no filter damage
- Shock-resistant, extremely sturdy special plastic and stainless steel container (corrosion resistant)
- 20 l to 55 l volume/some with tilting running gear
- can also be used with a pre-filter and/or paper filter

Accessories:

- complete professional handyman set included in the delivery scope.
- various accessory sets available as options
- Accessories storage and tube holder on the container (only 32 l + 45 l plastic containers)
- push handle and tilting running gear available as an option

Benefits:

- can be used universally for suctioning and vacuuming
